Exam tip

Exam tip Sentence structure and variation

The feature of Grammatical range and accuracy focuses on your ability to produce grammatically correct speech using both simple and complex structures. Therefore, in order to score a higher band score, test takers need to show examiners that they can use a range of complex structures accurately.

These are some recommended tips that test takers should keep in mind if they want to do better in the IELTS Speaking test Part 3:

- Using inversion instead of a normal structure;
- Using adverb clauses;
- Using passive voice;
- Using conditional sentences.
